

TOAD RK30

- Supplied with 2 x two button radio keys
- The system has full, in-built, CDL control to power/switch a vehicle's CDL system
- Total closure output - 10 or 20 second pulse - which is determined by the setting of DIP switch

Security Features -

- 2 x two button radio keys (water and shock resistant. Lost or stolen radio keys can be programmed out)

Convenience Features -

- Full remote central door locking/unlocking control with random encryption to prevent scanning and code grabbing
- Total closure output / headlight flasher output (which operates automatically on locking. A preset timed negative output of 500mA is provided for either 10 or 20 seconds upon locking - which can be paused mid operation by pressing button 1 on the remote for a second time upon locking the vehicle)

Personal Safety Features -

- Safety locking can be activated on each occasion when required. To lock the vehicle when the ignition is on press button one once on the remote. To unlock the vehicle simply turn the ignition off or press button two on the remote once whilst the ignition is still on.
