

SCORPION VA8ISO

Handbrake Alert -

- Provides a clear spoken audible warning of a disengaged handbrake if the driver vacates the vehicle and has not engaged the handbrake
- Utilises the existing audio system fitted to the vehicle
- Optional lights on warning, if the lights are left in the on position
- Positive and negative door inputs
- Low power consumption so the drain on the vehicles battery is minimal

Security Features -

- Warns the driver of the vehicle that the handbrake has not been applied and the vehicle is not being operated in a safe manor
- The unit can provide an audible warning, to inform the driver that the lights have been left switched on (optional)

Convenience Features -

- User friendly operation, in that the driver only has to turn off the ignition and begin to exit the cab and a warning will automatically start to sound if the handbrake has not been applied
- Interfaces with OE audio system on the vehicle
- The unit also notifies the user that the handbrake is applied
- Audible lights left on warning
- Easy installation, no modification of the vehicles braking circuit is required
